[(G)]Kudinova, A., MacPherson, H., Musella, K., Schettini, E., Gilbert, A., Jenkins, G., **Clark, L. A.**, Dickstein, D. (under invited revision). Personality traits and the course of suicidal ideation and nonsuicidal self-injury in young adults with bipolar disorder: Cross-sectional and prospective approaches. *Suicide and Life-Threatening Behavior*
**Under invited revision.** This paper is 1st authored by Prof. Dickstein's graduate student; thus, I am one of two senior authors. I imagine I was initially invited to participate in this work as a

courtesy because they are using a psychological assessment measure that I developed. However, I do not accept authorship purely as a courtesy, so I have been active in shaping the analyses and in interpreting the results.

**Under invited revision.** The data for this project were collected by Kotov under my supervision when he was a graduate student. Long story short, the paper was submitted and received an R&R decision, but it then languished until it was picked up by my now-former postdoc who is responding to the editor's and reviewers' comments and preparing it for re-submission.

**Under review** The primary author of this paper is Iranian. He invited me to be an author, seeking help with the writing and other aspects of the paper given my expertise in personality disorder assessment. I declined but suggested that my graduate student, E. G. Vanderbleek, could participate under my supervision.

Vittengl, J. R., **Clark, L. A.**, Thase, M. E., & Jarrett, R. B. (under invited revision). Psychometric properties of the Marital Adjustment Scale during cognitive therapy for depression. *Psychological Assessment*.
**Under invited revision** This paper is a product of a collaboration that has been ongoing for nearly 30 years. The data were collected for a randomized clinical trial funded by an NIMH grant to Jarrett and Thase. Vittengl is my former graduate student and he, Jarrett, and I meet virtually on a weekly basis to develop the conceptualization and data-analytic approach for the various manuscripts we have written together. Vittengl usually takes primarily charge of data analysis and initial writing, whereas both Jarrett and I are active in shaping the written product and shepherding it through to publication.
